

Catch & Release Vocabulary Workflow

From encountering a word to knowing it — automatically

YOU

Encounter a word or phrase

You come across a word or phrase you want to capture — a Spanish word you heard or read, or an English word you needed and couldn't say in Spanish. You open the Google Sheet and type it in — **that's all you do.**

Google Sheet

Type it in

instantly, while you type

AUTOMATIC

Spelling and accents fixed automatically

Don't worry about missing é, ó, ú, ñ — the sheet detects the language and corrects spelling and missing accents as you go. The original typo is saved as a note so you can see what changed.

caida → caída

ultimamente → últimamente

lucido → lúcido

when you run the enrichment script

AUTOMATIC

Finds a real native video for every word or phrase

The sheet looks up each word in your local Dreaming Spanish library and finds a video where a native speaker actually uses it. A clickable link to the video is written to one column, and the exact timestamp is recorded in the next column for reference. Already-enriched words are skipped.

Clickable video link

Timestamp in next column

Skips already-done rows

when you run the Anki sync

AUTOMATIC

Flashcards created and synced

Every word/phrase becomes an Anki flashcard — Spanish on one side, English on the other — and syncs to **all your devices** via AnkiWeb. Already-imported words are never duplicated.

Phone, tablet, desktop

No duplicates

when you want to review

YOU GET

Study anywhere

YOU GET

Jump to context

Open Anki on your phone and drill the words using spaced repetition. Anki decides what to show you and when.

Click any link in the sheet to open the video where the word is used. Use the timestamp in the next column to jump to the exact moment.

WHAT YOU GET OUT OF IT

Zero friction capture

Hear it, type it. No copy-pasting, no dictionary lookup, no formatting.

Real context, not textbook examples

Every word links to a native speaker using it naturally — the moment you can jump back to.

Correct Spanish without effort

Accents and spelling are fixed automatically. Type fast without worrying about the keyboard.

Study on any device

Cards sync to AnkiWeb the moment you run the script. Pick up your phone and start drilling.

Spaced repetition built in

Anki shows you words right before you'd forget them — no manual scheduling needed.

One source of truth

The Google Sheet is your vocabulary log. Everything else — cards, links, timestamps — flows from it.
